MPE GROUP

Your partner

The Multi Processing Equipment Group is the holding of 5 international operating companies, specialized in the development, production and sales of process systems and components for both liquids and solids.

MPE GROUP members:

Bolz-Summix
Jongia
Van Meurs
Techno-G
Terlet

Solids mixing & drying systems
Stirring & mixing equipment
Bag-in-box filling systems
Solids handling & processing
Process systems & equipment

After Sales

The reason you invest in equipment is to produce your products. The same goes for the equipment built by the companies of the MPE GROUP. In case of a standstill of the equipment you cannot produce and as a result of that, you lose money.

Engineers of the MPE GROUP can keep your equipment in good condition by regular controls and maintenance service, or complete revisions of your equipment.

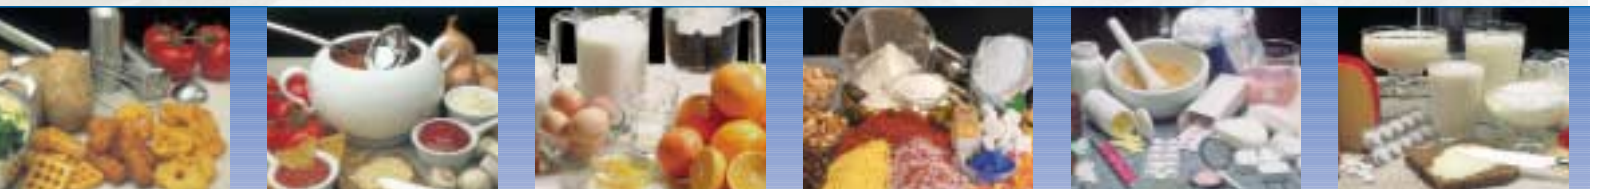

Activities of the MPE GROUP After Sales

- Service & Maintenance Prevention, periodical controls
- Revisions Mechanical seals, drives, vessels, tanks, Terlotherms, etc.
- Removals Complete- and partial process-lines
- Advice Estimates, calculations
- Delivery Accessories Bardiani Valves
- Delivery spare parts Valves, seals, scrapers, header tanks, filters etc.

We can deliver, all over the world, a large, range of spare parts, within a couple of days. Also we have the knowledge and experience in materials, accessories, measuring- and control equipment etc.

Supplementary to the MPE ROUP product range we deliver Bardiani valves. These high quality valves are already installed in various process systems and excel in functionality, reliability and price/quality ratio.

All-round in service

The MPE GROUP After Sales is reliable in its expertise and its service organisation. We deliver tailor made service of a high quality.

MPE GROUP Service

The MPE GROUP takes professional service as one of her main tasks. Therefore the MPE GROUP has a special service department, consisting experienced service engineers, available for all divisions of the MPE GROUP.

Reducing maintenance costs

But we can offer you even more than that. We are able to think about reducing maintenance costs and that starts out with thorough advice in the engineering phase up to the maintenance of your installed equipment. Other forms of service we offer: quick delivery of spare parts worldwide, training, commissioning and various kinds of maintenance-contracts.

Do you have questions regarding spare parts or do you want more information about our service possibilities? Give our spare parts department in Zutphen a call; we can help you, by telephone or on site, when needed.

Guidelines, certifications, codes:

- CE Machine Guidelines
- PED Guidelines pressure equipment 97/23/EG Module H/H1
- EHEDG (European Hygienic Equipment Design Group)
- FDA (American Food and Drug Administration)

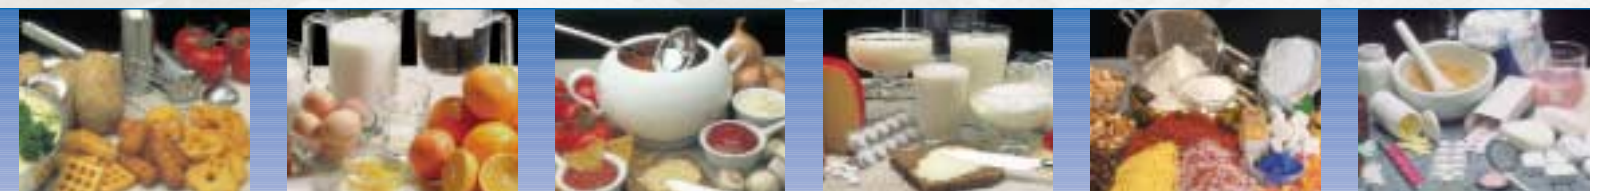

Personal approach and advice

When large reparations are to be done, we prefer to carry them out inside of our well utilized workshop with all spare parts and accessories in stock.

We can make a calculation of the expected costs of the reparation or revision.

When you do business, your choice for MPE GROUP equipment not only depends on quality, reliability, technical knowledge or keen prices. A good personal approach and advice are also very important. We keep our promises and even more than that!

MPE GROUP is VCA certified; which guarantees a safe working environment for our employees.
